

ETZINGER AG, founded and owned by aeronautical engineer **Christian Etzinger** and located in the Principality of Liechtenstein, has been manufacturing conical **high-precision burrs** since 2004. Over the past few years, the capacity of our fully automated production plant has been increased to over 1 million burr sets per year.

In 2018, we introduced our **etzMAX** to the commercial market, a series of electrical standalone grinders available in time- or weight-based version.

Climate change and growing energy costs have shifted our focus to manual grinding. To provide our customers with a sustainable and ecofriendly alternative, we have launched the manually operated tabletop grinder **etzMANN**, grinding straight from Hopper into Portafilter.

In 2022, we added the **etz-I** to our product range, an easy-to-use handgrinder, full of innovative features and 100% "Made in Liechtenstein".

etzMAX-plus

etzMAX

FEATURES Electrical Grinders

- Fast (3.0-5.0g/sec dependent on cone in use)
- Conical Precision Burrs
- RRB mechanism (Rotating Ring Burr)
- Easy to use&adjust
- Micro/Macro Adjustment
- Easy cleaning (no tools required)
- Low static (Anti Static Jig)
- Low retention (<1g)
- Modular System
- Different version&colors available

VARIATIONS

Espresso: Plus (Motor cooling) / M / Light
Filter: Plus / Light

Both models are available in two versions (time- or weight-based) and different colors (Black, Silver, White, Industrial). They may be used with Hopper (1000g/200g) or Single Dosing Device. Versions vary in productivity, drive unit (etzJET), front plate, start button, weight and delivery content.

etzMAX-filter

Our etzMAX is the first grinder that can grind by weight for filter coffee. If assembled with platform and filter cone (Filter Kit), all our Espresso Grinders may be converted into Filter Grinders.

etzMAN

etzMAn (Manual Standalone Grinder)

First Handgrinder to grind directly from Hopper to Portafilter without missing any of the benefits our electrical versions provide (low retention&static, easy to adjust&clean, RRB mechanism, different models&colors).

The etzMAn may be used with 200g Hopper (Delivery Content) or Single Dosing Ring. It is also available with built-in (ACAIA) scale (GbW).

etzFLEX

etzMAn for 2 or 4

Rack for 2 or 4 Hoppers (200g)

Our etzMAn allows for short time storage of beans and a quick change of roasts from cup to cup.

etz-I Handgrinder

**That ONE Handgrinder that simplifies it all ..
easy to adjust, use, clean and stow away.**

FEATURES

- Externally adjusted – Absolute Vernier Scale with 88 settings
- Quickly filled (no centre mechanics)
- Simply opened with a flick of the wrist
- Swiftly cleaned and reassembled (no tools required)
- Easily stowed away – Retractable Crank Handle
- RRB mechanism (Rotating Ring Burr)
- Anti-Static-Jig to eliminate static
- Magnetically attached lid & collection cup
- Different colors available
- Models: Trim (Diameter: 47mm), Regular (Diameter: 55mm)
